

THE FUTURE OF CARBON CAPTURE & UTILISATION (CCU) DEPLOYMENT

A national and European perspective

23 February 2021

10 am - 12 pm (CET)

Climate neutrality and circular economy are two major goals of the EU Green Deal and CCU is acknowledged as an essential element to achieve those goals within various economic sectors (e.g. industry, transport). To address this subject, CO₂ Value Europe organises a workshop in the framework of the EU INDUSTRY WEEK that will take place on the **23 Feb from 10 am to 12 pm (CET)**. We will bring together national and European voices to highlight the role of the CCU industry in future-proofing our economy and explain the challenges and opportunities for large scale CCU deployment.

Agenda		
10:00 – 10:05	Introduction & Moderation	<i>Anastasios Perimenis</i> Secretary General, CO ₂ Value Europe
10:05 – 10:20	The CCU industry in the European context	<i>Célia Sapart</i> Climate Expert and Head of Communications, CO ₂ Value Europe
